

Save On Energy Costs, Go Solar

Engineering Today For A Greener Tomorrow

Smart Solutions For A Sustainable Future

B-engineering is a leading provider of solar solutions for commercial buildings, committed to lowering emissions and fostering the use of renewable energy sources nationally.

Energy is supplied from the grid at approximately 200 grams per kilowatt of CO₂.

If your system generates 100,000 KW a year, that's 20 tonnes of CO₂

Generating one kilowatt of solar power reduces a company's footprint by 200 grams.

Saving You Money

At an average rate of 25p, you could potentially save around £25k per year by utilising all the solar generated energy.

- ✓ Lower energy costs
- ✓ Low maintenance
- ✓ High power production
- ✓ Reduce carbon footprint
